

Acquiring a License for Norman Residents (Ord. 3-211 Pet License Required)  
 If you are a City of Norman resident, your dog or cat is required to be licensed within 30 days of:

- Acquiring a dog or cat that is over six months of age
- A dog or cat over six months of age
- Moving to Norman with a dog or cat over six months of age
- The expiration of a City pet license
- Replacement of a lost or destroyed City pet license

Licenses can be obtained from our office during normal business hours, by mail or at participating local veterinarians listed. You will need to bring a current rabies certificate, but you do not need to bring your pet. If your veterinarian determines your pet should not receive a rabies vaccination for medical reasons, documentation is required and you must still license the pet.

You are required to notify the licensing department if the animal is deceased, lost, given away or is no longer in Norman. Failure to license will result in a costly citation.

Licensing by mail should enclose a copy of the rabies certificate with a check payable to Norman Animal Welfare mailed to:  
 Norman Animal Welfare  
 PO Box 370  
 Norman, Oklahoma 73070

We are closed on Sundays and on Holidays.

**How much is a pet license:**

Dog/Cat	Altered	Unaltered
One Year	\$8.00	\$15.00
Two Year	\$12.00	\$24.00
Three Year	\$16.00	\$32.00

\*Replacement Pet License: \$2.00

Proof of spay or neuter is required to receive the discount. Senior Citizens 65 and over, providing proof of age, receive a 50% discount on a one or three year license.

Rabies vaccination is required to be effective during the entire licensing period. Puppies and kittens first rabies vaccination is good for one year only. Therefore, your puppy's or kitten's first license will be issued for one year only.

**Term of License:**  
 A One or Three year license may be issued at the Owners option. However, a valid rabies vaccination must be for the entire license period.  
 Licenses issued will be valid from the first day of the issuing month to the last day of the same month for the one or three year period.
